YASHI
HI-TECH DIGITAL FACTORY

Picasso

“Let your power be the first”

In modern communication, the device plays an impressive emotional role, expressing the maximum power in delivering a message or product.

Today, the device is called Picasso. It delivers full-screen images, stability, and precision in both television and photographic shooting.

Picasso was chosen for the creation of the first immersive box at the MotoGP Grand Prix – a project with global visibility.

Thanks to its modularity, it allows for the desired size (resolution) to be composed. Installation is quick and easy using the included software.

The GOB construction technology ensures long-term reliability and durability, as well as easy cleaning of the display. The magnetic LED modules can be hot-swapped.

It is available with brightness levels of 1000 and 4000 nits and widths up to 960mm.

Its compact design features a walkable, anti-tip base.

It can be used horizontally, vertically, or even on the ceiling.

Usage is 360°: events, trade fairs, museums, pharmacies, restaurants, car dealerships, shopping centers, hotels, corporate lobbies, and more

Main features

- ✓ GOB Protection Technology
- ✓ Modular, Frameless System
- ✓ Brightness up to 4000 nits
- ✓ Ultra-Resistant Frame
- ✓ Spill resistant
